Process

The HiPEAC Vision analyses current trends that have an impact on the high-performance, edge and cloud computing and related communities. It formulates technical, methodological, standardization and policy recommendations to the HiPEAC community at large, and to policy makers.

The content is based on information collected through a number of channels.

- A survey circulated to all HiPEAC members.
- Meetings with teachers and industrial partners at the ACACES 2024 summer school.
- A consultation meeting on open source.
- Participation in tens of conferences and workshops on relevant themes for the HiPEAC Vision.
- Hundreds of informal discussions with experts from around the globe.
- Eight in-person editorial board meetings and eight videoconference meetings.
- Several coordination meetings with other organizations, such as ETP4HPC, ECSO, CHIPS JU, AIOT, ADRA, BDVA, SNS, NESSI, FIWARE, Destination Earth, Eclipse Foundation, etc…
- Feedback from presentations of the HiPEAC Vision 2024 at several conferences and workshops and from exchanges with DG CNECT.
